

keleen  leathers

DIGITAL LIBRARY

Welcome to our digital library. For detailed information regarding disclosed collections,
visit **keleenleathers.com** or call **630-590-5300**.

LEGEND

ANILINE - Leathers are full or semi aniline

- [FA]** – Full Aniline – leathers that are colored using translucent dye. Using a translucent dye colors the leather while also enhancing the natural beauty of the hide. A full aniline leather is the most natural leather look and finish available.
- [SA]** – Semi-Aniline – leathers that are colored using a mixture of translucent dye and pigments. This combination offers a finished product that minimize the natural characteristics of a hide without totally eliminating the natural elements.

CORRECTED - Leathers tweaked for a uniform grain and color combination

- [C]** – Corrected leathers provide uniform finished product. Here were correct any imperfections with the hide and color using pigments for a rich and uniform finish.

DISTRESSED – Leathers with a rustic or worn visual. There are two types of distressed leathers.

- [CD]** - Corrected Distressed – these hides are given a rustic and worn look while maintaining the same aesthetic for the life of the leather. The distressing and coloration will not change based on use of the product.
- [AD]** – Aniline Distressed – An aniline distressed hide offers the transparent beauty of aniline dyed leather in combination with rustic and worn aesthetic. With use and touch these leathers break-in over time crating the most natural distressing possible.

SPECIALTY – A variety of unique items.

- [S]** – Specialty items include hair on hides, unique prints, embossing and anything else we formulate with our tanneries. Specialty items often come in a variety of different sizes or configurations.

DURABILITY RATING – Assumes high contact use

- [ED]** - Excellent Durability - Extremely hard wearing. Ideal for commercial use in heavy traffic areas. Excellent in restaurants, corporate, hospitality, and more. Excels in residential applications with higher than usual use.
- [MD]** - More Durable - Hard wearing. An ideal commercial and residential quality offering and attractive hand with excellent wearing qualities. Great for corporate, lobbies, conference rooms and family rooms.
- [D]** – Durable - These products should be limited to “high end” residential and commercial applications where the application is not subjected to unusual demands for wearing and very frequent cleaning.

Please Note: Our digital library is to be used as a guide. Colors may vary. We recommend physical sample requests. Please also be aware that embossing patterns featured in this digital library can be applied to nearly any color and any collection.
